Art Unit: 1761

1. The disclosure is objected to because of the following informalities: The specification (page 1, first paragraph) omits the current status of parent SN 09/965,337.

Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roth (5,433,142, cols. 2, 4, and 6) in view of Hines.

Roth discloses contacting ground meat with a working gas to reduce microbial contamination and improve color retention. The contact is performed in a reciprocating pump that compresses the meat. The pressure is then released under vacuum and the meat subsequently transported through the system via a conduit. The reciprocation and subsequent transport both naturally result in mechanical action being applied to the meat. It would have been obvious to use ammonia gas or aqueous ammonia as the working gas in Roth since it is old to contact meat with ammonia or ammonium hydroxide to produce a bright red color in the meat, as evidenced by Hines (Exs. 1 and 2 and claim 1).

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 1761

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 17-33 are also rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 6,713,108. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to apply the mechanical action to the meat, in the process claimed in 6,713,018, without first removing the ammonia, if the meat color is not initially sufficiently bright.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arthur L. Corbin whose telephone number is (571) 272-1399. The examiner can normally be reached on Monday - Friday from 10:30 am to 8:00 pm.
